When does PA 99-858 become effective?

PA 99-858 became effective immediately upon being signed into law on August 19, 2016.

What are the medical devices that are taxed at the low rate?

PA 99-858 applies the low rate imposed on qualifying sales of food, drugs, and medical appliances to sales of products classified as Class III medical devices by the United States Food and Drug Administration that are used for cancer treatment pursuant to a prescription, as well as any accessories and components related to those devices. One example of such a device is tumor treating fields therapy, which is a prescription Class III medical device that is used for cancer treatment.

What is the low rate?

Statewide, the base sales tax rate imposed on sales of food that is to be consumed off the premises where it is sold (except alcoholic beverages and soft drinks), drugs, and medical appliances is 1%, but an additional local sales tax may apply to purchases made in the Metro-East Mass Transit District or the Regional Transportation Authority District. Use the Tax Rate Database, available on our website at **tax.illinois.gov**, to verify your local sales tax rate.
